This term we will be covering portraits.

1. Using the same structural lines as in this portrait, copy one of your own selfies from your phone looking at the camera.
2. Start really lightly with pencil drawing the structural lines and then add detail so that it looks like you.
3. You may want to use a mirror instead.
4. Use a pencil, line and tone to make it look 3D
5. Work for at least 1 hour. If you finish before the time finishes, draw the second one. Make sure the eyes are in the middle of the head height wise, like in this sketch.
